Amendments

In the Specification

Please replace the paragraph beginning at page 12, line 13 with the following paragraph:

D The term "peptide" is used interchangeably with "oligopeptide" in the present specification to designate a series of residues, typically L-amino acids, connected one to the other, typically by peptide bonds between the α -amino and carboxyl groups of adjacent amino acids. The preferred CTL-inducing peptides of the invention are 15 residues or less in length or 13 residues or less in length and usually consist of between about 8 and about 11 residues, preferably 9 or 10 residues. The preferred HTL-inducing oligopeptides are less than about 50 residues in length and usually consist of between about 6 and about 30 residues, more usually between about 12 and 25, and often between about 15 and 20 residues.

In the Claims:

Please cancel claims 40-70 without prejudice or disclaimer.

Please add the following new claims 71-265.

71. (New) An isolated peptide 10 amino acids in length comprising the oligopeptide VLAEAMSQV (SEQ ID NO:14422).

72. (New) The peptide of claim 71, which is 9 amino acids in length.
